## **Please Read ANNUAL NOTIFICATION TO SCHOOL PRINCIPALS 2023/2024 ASBESTOS MANAGEMENT PLANS**

Pursuant to the Asbestos Hazard Emergency Response Act (AHERA) Federal Regulations, the Local Education Agency (LEA) has the annual responsibility to notify Principals, employees, parents, teachers and occupants of any and all school buildings of the availability of the Asbestos Management Plan (AMP).

As Principal, Director, Administrator or Manager of a Bridgeport school building, you are also responsible to these Regulations and the AMP. No one from the outside is allowed to perform any repairs without first consulting the AMP. There is asbestos in nearly every school building. It must not be disturbed without prior authorization. You are the initial line of defense. All outside repair people are not allowed to drill, chop or saw into any building materials, lift ceiling tiles, modify any plumbing or fasten any screws, bolts, anchors, nails or staples without prior approval.

There will be a second notification to teachers, staff, unions, employees and occupants, a third notification to parents and a fourth notification to be distributed to every adult occupant in every school building. The State of Connecticut Department of Public Health Services has asked that the parental notification be sent home as well as posted in a conspicuous place or high-visibility area at the school building. Please allow any of the above-mentioned groups or individuals access to the AMP file.

2023/2024  
ASBESTOS MANAGEMENT PLANS**

Pursuant to the Asbestos Hazard Emergency Response Act (AHERA) Federal Regulations, The Local Education Agency (LEA) has the annual responsibility to notify union members and occupants of school buildings of the availability of the Asbestos Management Plan (AMP).

Every School Building that is under the control of the Bridgeport Board of Education has a copy of the AMP on file in its main office. The AMP is available for review by employees and union group representatives during the hours that the school is open. It cannot be taken from the building. Assistance in interpreting any of the AMP is available through me at my office: Board of Education Maintenance, 1085 Connecticut Ave., Bridgeport, CT 06607.

## ASBESTOS MANAGEMENT PLAN

The Federal Regulation "Asbestos Hazard Emergency Response Act" (AHERA) requires that the Local Education Agency (LEA) notify parents annually of the availability of the Asbestos Management Plan (AMP). The AMP is a file containing each school building's "asbestos history". The file is located at the main office in each school building. You have the right to look at the AMP.

There is Asbestos Containing Building Material (ACBM) in nearly every school building. The AMP file has information on the location of the ACBM, records of asbestos abatement projects, 3-Year Re-inspections, periodic surveillance, Asbestos bulk-sampling results, employee 2-hour awareness training, Material Safety Data Sheets (MSDS) and my credentials as Designated Person. The buildings are inspected every six months to determine any changes in the condition of the materials. Also, the buildings are thoroughly reinspected every three years by a licensed asbestos inspector. These inspections are designed to ensure that our schools are safe at all times.

## PLANES PARA EL MANEJO DEL ASBESTO

El Acta Federal del Reglamento "Asbestos Hazard Emergency Response" (AHERA) requiere que anualmente la Agencia Educativa local (LEA) le notifique a los padres sobre la disponibilidad del Plan de Manejo del Asbesto (AMP). Este plan (AMP) está en una carpeta que contiene el historial de cada edificio escolar. Usted tiene el derecho a revisar este plan (AMP) cuando quiera.

Hay material de construcción que contiene asbesto (ACBM) en casi todo edificio escolar. La carpeta del plan (AMP) contiene información de la localidad del ACBM, los récords de los proyectos para la disminución del asbesto, las re-inspecciones de cada tres años, la vigilancia que se lleva a cabo de manera periódica, las muestras de los resultados de asbesto en volumen, récord del adiestramiento de 2 horas para concientizar a los empleados, hojas de información de material de seguridad (MSDS) y mis credenciales personales como la persona designada para este asunto. The buildings are inspected every six months to determine any changes in the condition of the materials. Also, the buildings are thoroughly reinspected every three years by licensed asbestos inspectors. These inspections are designed to ensure that our schools are safe at all times.
